Log-Periodic Antennas

Helical Antennas

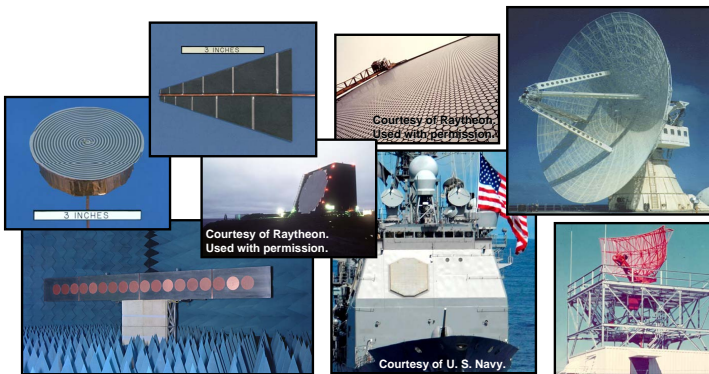

Figure 1. A picture of the all in reflector antenna.

Antenna Characteristics

- Accentuates radiation in some directions, suppresses in others
- Designed for both directionality and maximum energy transfer

Radar Antennas - 5
PRH 6/18/02

MIT Lincoln Laboratory

Antenna Definition

- “Means for radiating or receiving radio waves”*
 - A radiated electromagnetic wave consists of electric and magnetic fields which jointly satisfy Maxwell’s Equations
- Transitional structure between guiding device and free space

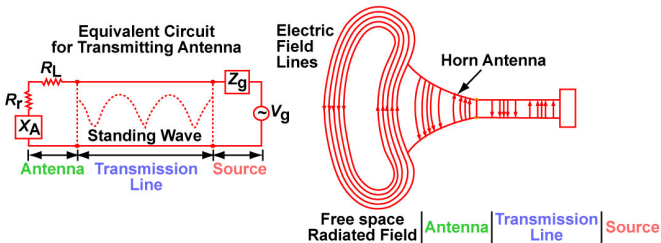

Figure by MIT OCW.
